

To whom it may concern,
Please reject petition 04-160. Technology has come a long way to help ease daily life. Satellite radio is part of that technology. It is just one of many communication tools I use to help me get from point A to point B with a little less stress and as safe as I possibly can. The NAB is thinking about the bottom line, money. I am thinking about safety. You would be doing all an injustice to take away this paid service.
Thank you,
Janice Drouin
